

Window

IComponentConnector

Hake_WPF.LoginWindow

```
classDiagram
    class Window
    class IComponentConnector
    class Hake_WPF_LoginWindow["Hake_WPF.LoginWindow"]
    Window <|-- Hake_WPF_LoginWindow
    Window --> IComponentConnector
```

The diagram illustrates a class hierarchy and an association. At the top, there are two boxes: 'Window' on the left and 'IComponentConnector' on the right. Below them, centered, is a box labeled 'Hake_WPF.LoginWindow'. A vertical line descends from the bottom center of the 'Window' and 'IComponentConnector' boxes, then splits into two horizontal lines. Each horizontal line ends with an upward-pointing arrowhead, indicating that 'Hake_WPF.LoginWindow' inherits from both 'Window' and 'IComponentConnector'.
